Dan,

I have a feeling that will put us over budget; I'll work with Nick to determine just how much (though will be difficult to tell until we have the data for mapping) and get back to you.

Thanks,

Colin Willits | GIS Specialist / Project Manager

Nick, thanks for the information.

On a related topic, I found out today that I'll need five copies of this figure, rather than just one as I originally thought. I don't know exactly how much each figure costs to print, so let me know if having five copies made will exceed our budget for this TO. Also, let me know if this will affect ARC's turn-around time significantly.

Thanks,
Daniel R. Gravatt, PG

Principles and integrity are expensive, but they are among the very few things worth having.

We should probably try to have the figure ready to send to ARC, the printing company that will print the map on foam-board, by this Friday, June 21st if possible. For the amount of time it will take to complete the figure on our end, it will really just depend on the complexity or number of updates to make on the figure.

Thank you,
Nick

Nick, not yet, hopefully a bit later this week. How long do you think you would need between data delivery and delivering the figure to EPA?

Dan,

I just wanted to check to see if the data is available to create the West Lake Landfill figure that you will be needing for the public meeting on June 25th.

Thank you,
